callrun Bluetooth Control App Guide

For RC-2000 / RC-3000 cases with Bluetooth camera shutter and light control

1. Supported Platforms

Android 9.0 and above, iOS 13.0 and above. The app requires Bluetooth 4.2 or newer.

Download the callrun Control app from the official download center or the app store on your device.

2. Pairing

Open the app and tap "Add device".

Power on the case by holding the function button for three seconds until the indicator pulses blue.

Select your device from the list. The name appears as "callrun RC" followed by the last four characters of the serial number.

Keep the phone within one meter during pairing. Pairing completes automatically once the indicator turns solid.

3. Feature Overview

Remote camera shutter. Trigger photos from up to ten meters away with a single tap.

Light control. Adjust brightness of the case built-in LED in three steps.

Battery status. The app displays the remaining charge of the case battery.

Firmware update. The app notifies you when a new firmware version is available.

4. Charging

The case uses a magnetic charging dock. Align the charging contacts on the back of the case with the dock pins.

A full charge takes approximately ninety minutes. The indicator turns from red to green when charging is complete.

Do not charge the case while the port covers are submerged or the case is wet.

5. Troubleshooting

The device does not appear in the list. Confirm the case is powered on and the phone Bluetooth is enabled.

The shutter does not respond. Open the app to confirm the connection indicator shows connected.
