callrun Rugged Case User Manual

Model RC-2000 / RC-3000 Rugged Waterproof Protective Phone Case

1. Package Contents

1 x Rugged waterproof phone case with built-in screen protector.

1 x Lanyard with metal clasp. 1 x Spare port cover set (2 pieces). 1 x Microfiber cleaning cloth. 1 x Installation guide.

2. Product Parameters

Model: RC-2000 / RC-3000. Material: TPU + PC composite with silicone sealing.

Ingress protection: IP68 (dust tight and waterproof to 2 meters for 30 minutes).

Drop resistance: 2.0 meters on concrete. Operating temperature: -20 C to 55 C.

Weight: 58 g. Available colors: Black, Navy, Army Green, Orange.

3. Installation Steps

Step 1. Remove the case from the packaging and clean both the case and the phone with the supplied microfiber cloth.

Step 2. Open the case, align the phone with the camera cutout, and press it down until the frame is fully seated.

Step 3. Close the front cover. The raised bezel must sit 0.5 mm above the screen edge.

Step 4. Install the port covers. Press each cover firmly until the gasket compresses and the icon turns to the locked position.

Step 5. Attach the lanyard through the bottom anchor hole. Do not over tighten.

4. Waterproof Operation

Always close all port covers before the phone is exposed to water or dust.

Before immersion, test the seal with the included verification card. If water enters, dry the case for 24 hours before reuse.

After every water exposure, rinse the case with fresh water and dry the port covers before opening them.

Do not operate the buttons or camera while the case is submerged.
