callrun Video Tutorial Guide

A companion index for the demonstration videos published on the callrun video showcase page

1. About the Series

The demonstration series covers installation, sealing, water resistance, drop protection, and everyday care.

Each episode is under one minute and can be viewed on desktop and mobile without installing any software.

The series is updated monthly with new episodes based on common customer questions.

2. Episode Index

Episode 1. Water immersion demonstration. How the sealed case behaves under sustained submersion.

Episode 2. Port cover sealing close up. The correct way to press the cover until the lock icon appears.

Episode 3. Build inspection. Surface texture, button feel and bezel height examined under an inspection lamp.

Episode 4. Drop impact. What happens to the case and the screen protector in a realistic fall.

Episode 5. Water beading. The hydrophobic surface effect on the case back.

Episode 6. Installation. Loading the phone and aligning the camera cutout.

Episode 7. Color lineup. Comparing the four available colorways side by side.

Episode 8. Lanyard carry. Attaching and using the lanyard in daily carry.

3. Viewing Notes

Playback requires a browser with HTML5 video support and a working internet connection.

Captions are provided in English and Simplified Chinese.

For further support contact support@callrun.net and quote the episode number.
